## Summary

I am a driven fullstack developer with experience building modern web applications, APIs, and digital solutions from idea to working product. I have worked on projects involving AI, real-time features, and complex business logic, and I enjoy quickly adapting to new technologies while creating user-friendly, scalable solutions. I have demonstrated my project at DevSum and participated in IT events such as Swetugg to stay up to date with modern web development.

## Technical Skills

**Programming languages:** HTML/CSS, JavaScript, TypeScript, SQL, Golang, Solidity

**Technologies:** React.js, Next.js, Node.js, Express.js, Nest.js, SASS, TailwindCSS, Redux, Zustand, ReactQuery, PrismaORM, React Three Fiber, Vue.js

**Languages:** Advanced English and Swedish. Native Ukrainian. Fluent Russian.

## Work Experience

**Active Solution** | Fullstack Developer / LIA Intern

01/2026 – 06/2026

- Developed an interactive 3D web application for DevSum in Stockholm, which was presented during the event and received positive feedback from participants
- Developed a user-friendly admin panel for managing game content and settings
- Optimized the game's performance and increased the frame rate from 30 FPS to up to 100 FPS

**NovaBit** | Fullstack Developer

03/2024 – Present

- Built a complex API with caching and WebSocket implementation.
- Developed an e-commerce platform with a user-friendly admin panel and the ability to easily manage and update website content.
- Created Telegram Mini Apps of different complexity levels.
- Optimized website performance and SEO up to 98%.
- Built complex applications with internationalization, SSR, and SSG.

**NIX Solutions** | Frontend Developer Intern

01/2023 – 06/2023

- Created a uniquely designed user interface with HTML/CSS and React.js
- Developed responsive landing pages with custom animations

## Projekt

- [VTIKHA](#) – a Ukrainian e-commerce platform for bags (TS, Next.js, Express.js, SQLite, PrismaORM)
- [Focal](#) – an AI-driven productivity platform that helps developers prioritize the right tasks, plan their day realistically, and stay in control of every decision (TS, Next.js, Express.js, OpenRouter, PostgreSQL, PrismaORM)
- [ACars](#), [American Express](#) – a website for buying cars from American auctions (Next.js, TypeScript, MySQL, Python, Golang, Zustand)
- [MakMoney](#) – a personal finance platform to track income, expenses and savings goals with a clear overview of your finances (TS, Next.js, Supabase)
- [ActiveDJ](#) – an interactive 3D web game inspired by the classic Asteroids, developed during my LIA internship for DevSum and controlled with a DJ controller as game input (React.js, .NET C#, R3F)
- [Soundy](#) – a fullstack music platform (Next.js, TypeScript, Zustand, PostgreSQL) [Open source](#)

## Education

**Fullstack JavaScript Developer**

**Chas Academy**

**Stockholm, Sweden**
